Imperial Railways of North China.

Report for the Fifteen Months ended 31st December 1909.

Published for circulation by order of the Directors.

Imperial Railways of Morth China.

GENERAL REPORT.

It will be observed that the period under review in this report extends from the 1st October, 1908, till the 31st December, 1909, a total of 15 months. This is due to the fact that, in order to ensure uniformity in the reports, accounts and statistics of all Government Railways in China and for the purposes of easy comparison, the Board of Posts and Communications have arranged that in future the financial year of all Government lines will be closed on one date. The date chosen is the 31st December.

During the autumn rains of 1909, the Liao River in the neighbourhood of Hsinminfu again overflowed its banks, and flooded the whole of the surrounding country. In consequence the line passing through that district was damaged in three places and traffic was suspended for nine days.

The trade of North China has, on the whole, been most satisfactory. In Manchuria, however, where formerly we had a large traffic in beans and beancake, now we have none. The South Manchuria Railway have captured the whole of the industry.

Results.—The results of working for the period abovementioned are as follows:-

| Earnings | | | | 1 | | | | | | | | \$ | 14,345,201.74 |
|----------|------|-----|---|-----|-----|-----|----|---|-----|-----|----|----|---------------|
| Working | Expe | nse | S | | | | | | | | | " | 4,554,013.32 |
| Ratio of | Work | ing | E | Exp | ens | ses | to | E | arn | ing | SS | | 31% |

- Milage.—The total number of miles of main line open to traffic on 31st December, 1909, was 602.78 miles.
- Betterments—Improvements to the line and additions to the rolling stock have been made at the charge of Revenue to a total of \$1,011,371.33.
- Capital—In terms of the Hsinmintun—Mukden Railway Agreements, the South Manchuria Railway Company were entitled to contribute one half of the estimated cost of reconstructing the line east of the Liao River into Mukden. This contribution has now been received and amounts to Gold Yen 320.000.
- Loan of 1899—The amortisation of the Imperial Chinese Railways 5% Gold Loan of 1899 regularly continues. On 1st August, 1909, this loan was again reduced by £57,500, the amount of the Fifth Annual Drawing, and now stands at £2,012,500. The interest on the loan has been duly met to date.
- Exchange—The monthly remittances to London for repayment of Loan Capital and Loan Interest have been effected at the average rate of 2/5⁷/₁₆ per Tientsin Tael.
- Hsiling Railway.—This short line constructed by the Chinese Government out of its own funds, though a branch of the Peking-Hankow Railway, was, after construction in 1903, placed under the management of the I.R.N.C. As it has since been found that it could be worked and controlled more efficiently by the Peking-Hankow Railway as an integral part of their system, the management of the branch was handed over to that Administration on 1st January 1909.
- Engineer in Chief.—Mr Claude W. Kinder, C. M. G. who had been connected with the I. R. N. C. since the inception and who was the first Engineer-in-Chief, resigned his position in April, 1909, after a little over 30 years service. The Director General endeavoured to persuade Mr. Kinder to remain in the service, but he insisted on retiring. Finally the position of Consulting Engineer in London was offered to Mr. Kinder, but he would not accept it.

Mr. Bellingham was selected as successor to Mr. Kinder, and an agreement had been signed by him with the Director General, but he died before entering on his duties. His untimely death was a regrettable event to the administration. Since then the Directors have pleasure in reporting that an Agreement has been arrived at with Mr. D. Poyntz Ricketts appointing him to the vacancy.

Staff.—The Directors take this opportunity of thanking the Staff for the able and hearty services rendered by them.

Loo Etong, Managing Director. Luk Hsu Sheng, Director

IMPERIAL RAILWAYS OF NORTH CHINA.

AUDITOR'S CERTIFICATE.

The accounts for the fifteen months ended 31st December, 1909 as stated, contain, in my opinion, a full and true statement of the financial condition of the Railway, and the revenue has, in my judgment, been charged with all expenses which ought to be paid thereout. The interest and redemption of the Loan during the period have been fully met.

Tientsin, 12th March, 1910.

A. F. Algie,

Auditor.

ENGINEER'S CERTIFICATE.

I hereby certify that the Permanent Way, Bridges, Stations and other buildings in connection with the Permanent Way have been maintained in good order.

Tientsin, 31st December, 1909.

A. G. Cox,

Acting Engineer-in-Chief.

LOCOMOTIVE SUPERINTENDENT'S CERTIFICATE.

I hereby certify that the Plant, Engines, Cars, Machinery and Tools have been maintained in good repair.

Tongshan, 31st December, 1909.

F. A. Jamieson,

Locomotive Superintendent.

Signals:

Hsinminfu to Chuliuho and Kaopangtzu to Yingkow stations have all been installed with home and distant up and down signals, which complete the signalling installation at all Outside Wall stations. New point motion and locking bar apparatus also installed at all Outside Wall

Heavy work executed:-

In addition to other works the West Moukden section 17,500 feet of new line was made leading up to the Liao Bridge, improving the alignment and raising the railway. This has been ballasted and is now complete. One station at Chuliuho has been made on this new line, and bridges 57, 58, 59 and 2 sunk tracks.

Foreshore protection:

700 fong of rubble and ballast has been used for repairs to Yingkow Bund.

Wharfage :-

Yingkow wharf bracings repaired.

Painting executed for maintenance: -

Bridges 131, 132, and 179 to 191 and 254 to 263 inclusive.

Shanhaikwan Locomotive Shed.

Water tank, Shihho and Suichunghsien.

Woodwork of all stations Shanhaikwan to Shahouso.

All station rooms, native quarters and sheds whitewashed.

Ferry boat and pontoons painted as usual.

Bainfall and Floods :-

On the hills above Hsinminfu and on the Lienchan to Sarho section the rains were heavy, resulting in floods similar to those of last year, which caused so much damage.

The heavy protection and extensions put in this year and the new spurs to the bridges have proved satisfactorily, and only in a few places will extensions and further provision of water area be required to existing bridges.

At Hsinminfu the Liu river has steadily silted up its bed and broke out twice, on April 4th

and August 2nd.

On April 4th the country north of the railway was flooded and the railway just escaped a washout. Training works were carried out within the railway sphere of action, but nothing was done beyond, and on August 2nd the river broke out again seriously breaching the railway, stopping the traffic for 10 days, and filling up a large section of country with silt, so that the railway formerly on an embankment 4 feet high is now only a little above the river bed, and in some places below it.

The rainfall registered at the different sections was as follows:-

Shanhaikwan 19 inches

Ningyuanchow 25

Kaopangtzu 13 " (for July, August and September only.)

Yingkow

East Moukden Extension.
